Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 6/27/08 have been fully considered but they are not persuasive. As a preliminary matter, the comment refers to MPEP 2701. It appears that MPEP 2107 was intended. In any event, it is alleged that the specification page 4, line 8-page 5, line 1 and page 13, lines 4-6 satisfy the assertion that the claimed invention is useful and such assertion would be considered obvious by a person of ordinary skill in the art. However, a review of the supporting written description, specifically the different section of the same noted by applicant, does not show any specific and substantial utility for the claimed invention. Note MPEP section 2107(B)(1)(i) that states that

(i) A claimed invention must have a specific and substantial utility. This requirement excludes "throw-away," "insubstantial," or "nonspecific" utilities, such as the use of a complex invention as landfill, as a way of satisfying the utility requirement of 35 U.S.C. 101. in response to this office action, applicant is required to explicitly identify specific and substantial utility for the claimed invention and provide evidence that one of ordinary skill in the art would have recognized that the identify specific and substantial utility was well established at the time of filing.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 15-18 are rejected under 35 U.S.C. 101 because

Art Unit: 2611

the claimed invention lacks patentable utility. Let consider claim 15, the claim recites a method comprising the step of providing a memory device and sending a write address to the memory device. However, there is no specific and substantial utility asserted to the claimed invention. As per claim 17, the claim recites the steps of providing a memory and performing a write address mapping function. However, there is no specific and substantial utility asserted to the claimed invention.

Claims 16 and 18 are likewise rejected because they fail to cure the deficiency noted in the base claim.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claim 25 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 25 recites the limitations of "applying a sequence of read addresses to the read address port, said read address generator configured to generate a plurality of read addresses, and further configured for selecting a subset of said plurality of read addresses to define said sequence of read addresses." However, the specification, as filed does not provide support for such limitations as claimed.

6. Applicant's response has overcome the outstanding 112 second paragraph rejection.
7. Claims 2-14 and 19-24 are allowed.
8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
